

## KARDEX – Horizontal – Carousel

### Project: American Saw, NL-Helmond

#### The different Horizontal

American Saw ordered some year ago in USA 2 Heavy Duty-Horizontals. The speciality is, blades for saws are stored on wooden paletts in the Horizontal

The 2 Horizontals are not used as a real Pickstation, they are a Puffer- and Pickstation. The paletts with the blades will be handled with a Forkliftunit, single blades are picked manually.

The shelves are Special-Heavy-Dutyselves. Till today the installation works without problems.

#### Station with 2 Horizontals

- Control by Mikroprocessorkeyboard
- digital Displays for picklevel and pickquantity
- Picking openings secured by automatic sliding doors
- Replenishment with Forkliftunit

#### Specification

2 Horizontals Typ 762-610-62-2464/2902

Load: ea Shelf 250 kg  
ea Carrier 680 kg

Total no. Of carrier 124

Installation Juni 1997
