

KARDEX

KARDEX – Horizontal – Carousel Specialhouse Hofman

Save Space gain Time for „Homoeopathical Medicaments“

For the distribution of the medicaments, vitamine preparates and nature-food-products, Hofman uses 4 vertical (Industriever) and 2 horizontal carousels (HoKa).

Hofman installed 4 vertical carousels to use the height of the room and save space. Each carousel brings the requested goods precisely to the access opening, in a matter of seconds and by the shortest way.

But, to reduce walk time between the systems, to increase the pick rate and the storage capacity, Hofman installed in a second step 2 horizontal carousels.

Only 1 person picks the articles out of 2 Horizontals. The I-form reduce the distance (walk way) from one to the other carousel to less then 2 m.

The average pick performance is 270 – 300 orderlines per hour.

Technical details

4 Vertical Carousels

Typ 251 and 351-2812

| | |
|--------|-------------|
| Height | 5.250 mm |
| Width | 14.200 mm |
| Depth | 1.750 mm |
| Total | 224 shelves |
| Total | 54 m3 |

2 Horizontal Carousels

Typ 825-610 with 40 and 34 carriers

| | |
|---------------------|-------------|
| Installation lenth | 19.800 mm |
| Installation width | 4.650 mm |
| Installation height | 2.292 mm |
| Total | 74 carrier |
| Total | 259 m3 |
| Total | 518 shelves |
